January-February 2006

FEBRUARY 1, 2006 MEETING

Macworld Expo Report and Peachpit's Photoshop World Program-in-a-Box

Join us on Wednesday, February 1 at 7:30 pm in Hodgdon IRC, lecture hall 4 on the SUNY Oneonta campus for our first meeting of 2006.

MUG ONE president Elsa Travisano will share the news and excitement of Macworld Expo San Francisco and User Group University 2006.

Then we'll enjoy video highlights from Photoshop World Boston 2005, complete with candy, popcorn (if we can find a way to pop it), discounts and door prizes, all courtesy of Peachpit Press. Don't miss the fun!

As always, you'll hear the latest news and helpful hints, get a ticket for the door prize draw (members only), and share refreshments with us. Everyone is welcome.

For directions, see SUNY Oneonta's detailed campus maps:

<http://www.oneonta.edu/navigation/directions.asp>

or download John Maas's annotated Oneonta map:

MACWORLD EXPO SAN FRANCISCO - INTEL MACS AND EVERYTHING IPOD

Now that the calendar boasts only one [Macworld Conference & Expo](#) a year (the East coast summer Expo was finally cancelled due to dwindling attendance), San Francisco in early January is *the* place for vendors, developers and Mac and iPod users to gather.

From January 9-13, Moscone Center in San Francisco was bustling. Conference track sessions were filled at times to overflowing, a situation which IDG conference coordinators deftly handled by offering impromptu encore presentations to accommodate the crowds.

The Expo show floor was similarly packed with vendors and showgoers alike. iPod accessories were everywhere, as were startup companies and new offerings from established players. From all indications, the world of [Apple](#) – bolstered to no small degree by the iPod phenomenon – is on a formidable upswing.

Steve Jobs' [Keynote address](#) on Tuesday morning is always the highlight of the event for hard-core Mac aficionados. Conference pass holders line up well before

MUG ONE SWITCHES TO WEDNESDAYS

This spring MUG ONE moves to a new **Wednesday** meeting day in Hodgdon IRC **lecture hall 4** on the SUNY Oneonta campus.

Meetings are scheduled for:

- February 1
- March 8
- April 5
- May 3
- June 7

Mark your calendars, update your iCal, and be sure to join us in the months ahead!

MUG ONE OFFICERS FOR 2005-2006

Elsa Travisano, President mugone@stny.rr.com	607/433-2569
Sven Anderson, Vice President anderss@oneonta.edu	607/436-3174
Terry Helser, Sec. & OSC Liaison: helsertl@oneonta.edu	607/638-9885
Joanne Johnston, Treasurer ejohnston@stny.rr.com	607/432-6320
John Maas, Program Co-Chair xaxat@stny.rr.com	607/437-0665
Jesse Hogue, Program Co-Chair jessehogie@mac.com	607/436-6912
Brian Foley, SIG Coordinator foleymb@dmcom.net	607/988-7031
Johanna Koenig, Librarian email: jokoenig@dmcom.net	607/432-4975

DECEMBER 6, 2005 MEETING

Holiday Gifts Round Up and MUG ONE's 20th Birthday Celebration

7:30 pm, Hodgdon IRC, Lecture Hall 2, SUNY Oneonta

Our "fearless leader" Elsa Travisano began by congratulating us on our 20th birthday, and recognizing Tom Hughson, the only founding member in attendance. We discussed the day to meet next semester and agreed to try Wednesday nights, so the next meeting will be on Wednesday, February 1 at 7:30 p.m. in Hodgdon IRC, lecture hall 4. Note the new room as well.

We were so swept away by November's presentation that we neglected to elect new officers at that meeting, so the gathered assembly anointed the chosen once again to carry the burden and the joys of another year (ie. we held elections).

Q & A

As the Question & Answer session started, Brian Foley distributed MUG ONE birthday celebration gifts from the Apple User Group program - a Tiger pen light for everyone in attendance. First up was a discussion of problems with the new Safari browser. The resident gurus suggested having two or more browsers installed on your Mac, such as Firefox 1.5 (free) and Safari, with Internet Explorer being the worst option as it is no longer being supported by Microsoft. It seems that no one browser will work with every Web site. There was enough interest in the topic that it was suggested we offer a program on browsers sometime this spring.

Other discussions focused on Internet providers, with a positive report from Gerry Stoner on his new satellite service, and on Quicken 2006 (some features are not working properly - proceed with caution until the app has been updated, and keep your earlier version on hand was the consensus) and using either M.Y.O.B. personal version or Tiny Books, a shareware financial tracker available through www.versiontracker.com, or staying with earlier versions of Quicken as alternatives to upgrading. If you are thinking of purchasing Virtual PC, the suggestion was to wait until after Macworld Expo announcements, or until next month's meeting when Elsa will share her Expo report with us.

Elsa announced that discounts and special offers for user group members are posted now at the Apple User Group Advisory Board's website <http://homepage.mac.com/ugab/offers/vendorcodes.html>. The codes you need to access offers are available in Newsbreak. The current password is *****

Treasurer Joanne Johnston reported \$1,632.74 in the bank after spending over \$300 on raffle prizes for tonight. Brian distributed his tribute to MUG ONE's 20th anniversary, a crossword puzzle that he created for the occasion. The

puzzle, and its solution, appear in this month's issue of Newsbreak.

Program

Elsa gave us a short history of MUG ONE, which began with our first meeting on January 26, 1986 in Milne Library. Group meetings migrated to the Leatherstocking Historical Society offices on Main Street, then to Hartwick College for several years before returning to the SUNY College at Oneonta campus - in the Physical Sciences building, and finally in the Hodgdon Instructional Resources Center when we outgrew the Physical Sciences meeting space. Elsa reminded us of past group highlights, including picnics at Wilbur Park and at the Oneonta State College Camp, spearheaded by former president Jay Manning. We also (wo)manned a booth at Macworld Expo in New York in the summer of 2002. After she was finished, Elsa and the rest of officers were thanked with a round of applause for 20 years of a job well done.

Sven Anderson made sure that our Non-Disclosure Agreements with Apple were up to date before revealing the latest, top-secret...SE 30! Several of the more experienced Mac hands in the audience remembered owning one of these beige beauties back in the 80s. Nicely done, Sven. Brian then gave a demo of the software he used to create the crossword puzzle.

We were reminded that the Apple Store in Crossgates Mall, Albany is a valuable resource for training workshops. Go to <http://www.apple.com/retail/crossgates/> for the calendar of events, which are free to attend.

Elsa then showed the prizes to be won, including an iPod shuffle, iPod socks, a watch with built-in USB flash drive from LaCie, InDesign CS software from Adobe, ear phones, cables, tote bags, games, software, a "mighty mouse", an Airport Express, Radtech cleaning liquid and cloth, and books from O'Reilly and Peachpit Press. A true cornucopia of holiday gifts. Talk about an inducement for keeping your membership up to date!

We finished the meeting with birthday cake from Hannaford's and various holiday treats contributed by members. This is the fellowship and fun that epitomizes MUG ONE. For a taste of the fun, see Jesse Hogue's photos: <http://homepage.mac.com/jessehogie/PhotoAlbum4.html>

The first meeting of the new year will be "Macworld Expo Report and Peachpit's Photoshop World Program-in-a-Box" on Wednesday, February 1 at 7:30 pm in Hodgdon IRC, lecture hall 4 on the S.U.N.Y. College at Oneonta campus.

Elsa Travisano will present the latest and greatest from Macworld Expo San Francisco and treat us to the Photoshop World Program-in-a-Box from Peachpit Press. Be sure to join us for this special meeting.

— TERRY L. HELSER, SECRETARY

– *Macworld, continued from page 1*
 dawn for the chance to see Job's impeccably orchestrated presentation in person.

Jobs' top hardware announcements were the iMac with Intel core duo processor and MacBook Pro laptop, the first two Macs based on Intel chips. Chief cool new feature of the MacBook Pro is a magnetic power cord connector that disconnects if the cord is tripped over. For the iPod came the iPod Radio Remote, a remote control and FM tuner, as well as iPod integration in 2006 Chrysler, Jeep and Dodge models.

In software, iLife '06 debuted with iWeb, a website creation program fully integrated with other iLife apps that lets you easily create websites and weblogs (blogs) with photos, movies and podcasts. Also announced was iWork '06, comprising Keynote 3 and Pages 2. The applications offer 3D charts and more templates, but no spreadsheet or database capabilities. Macworld Magazine's [Best of Show](#) roundup reports on best new products on the show floor.

The [Apple User Group](#) community was out in force all week, starting with the eighth [User Group University](#) for user group leaders on January 9. Produced by the Apple [User Group Advisory Board](#) and the [Macworld Planning Team](#) (Elsa Travisano serves on both teams) the event was attended by more than 130 user group leaders from around the world and featured sessions led by an all-star cast of Mac luminaries: David Pogue, Adam Engst, Bob LeVitus, Christopher Breen, Terry White, and Apple's original evangelist, Guy Kawasaki.

The UGAB and Planning Team also sponsored the [User Group Lounge](#), which offered a full schedule of interest group meetings and presentations by industry notables. User group members volunteered in the Lounge, as show floor guides in the Apple User Group Guides booth, and represented groups from China, Japan, Canada and the U.S. in the User Group Booth. Information on all the user group activities can be found on the UGAB website: <http://homepage.mac.com/ugab/news.html>.

MAC 911 – HELP DESK

Solutions to your most vexing Mac problems

By Christopher Breen

MEDIA MELTDOWNS

I have converted many old VHS tapes to DVD-R, using name-brand media. When I tried to view one of my DVDs 18 months later, it stalled, skipped, and stopped dead in its tracks. I watched the DVD right after burning it, and it played perfectly. I thought that once I made a successful DVD, it would last basically forever. What's going on? – *Mike Volpe*

Although the folks who manufacture DVDs claim that the discs can last for years, they base that claim on lab tests designed to simulate the aging process. When it comes to the real world, only time will tell.

Factors that can contribute to failing media are poor quality (not all DVDs are created equal), humidity, sunlight, and abuse. But you can lessen the impact of these factors.

To begin with, buy good media. Those in the know suggest that Taiyo Yuden's products are reliable and stable when treated well. A Google search will turn up American companies that sell this Japanese brand. Next, carefully store your discs in an environment that's as moisture- and sunlight-free as you can find—for example, in an airtight container with a silica gel pack, tucked away in a cupboard. And you should, of course, put discs back in their cases rather than leaving them atop a hot AV amplifier or letting your five-year-old use them as Frisbees.

Your tale of woe also demonstrates that one should never rely on a single backup to a particular medium. The more copies you make, and the more different media you use, the more likely it is that you'll be able to recover your data down the road.

iPod Insurance

I know that iPods suffer glitches with some frequency, and reloading all my tunes is quite a tedious and frustrating process. Is there an easy way to store a perfect clone that I can put back on the iPod in case of emergency?

– *Bob Marketos*

Mike Bombich's \$5 Carbon Copy Cloner can do the job. Connect your iPod to your Mac and launch Carbon Copy Cloner. From the Source Disk pop-up menu, select your iPod. From the Target Disk pop-up menu, choose the hard drive where you want to store your backup (see "Prone to Clone"). Click on the Preferences button; in the sheet that appears, enable the Create A Disk Image On Target option.

Click on Save, click on the lock icon next to the Clone button, enter your administrator password in the resulting sheet, and click on OK to dismiss the sheet. Click on the Clone button, and the program will begin cloning everything on the iPod to a disk image on the target drive.

If you need to restore this backup to your iPod, first erase the iPod by installing the latest iPod Updater. Then, on the target drive, double-click on the disk image to mount it. (It will be called name of iPod.sparseimage, where name of iPod is the name of your iPod.) Launch Carbon Copy Cloner, choose the mounted disk image as the source, and choose the iPod as the target. Click on the lock icon again. Once you've entered the required password, click on the Clone button. Carbon Copy Cloner will copy the data stored in the disk image back to the iPod. Once the process is complete, your iPod will regain all the music and data it had when you first cloned it. Naturally, it won't have any music or data you've added since then.

Another alternative should be available by the time you read this: ProSoft Engineering's \$59 TuneTech. ProSoft says that in addition to backing up your iPod, TuneTech will repair it, optimize its playlists so they're more efficient (meaning that your iPod's hard drive has to spin up less often, thus saving the battery charge), salvage some deleted files, shred data, duplicate the iPod's contents to another iPod, and scan the iPod's drive for damage.

Simpler Spotlight

Is there any way to make Spotlight search just document names and not the contents of the tens of thousands of files I have on my hard disk? – *Ron Belisle*

The best solution I've found is to enter your search term inside quotation marks. Although this doesn't narrow your search to just document names, it does narrow it to instances when those words appear together. For this reason, the closer you come to the file's full name, the more accurate your results will be.

For example, if I enter Mac 911 invoice with no quotation marks, Spotlight offers 151 matches (and would offer scads more if I used an e-mail client that Spotlight indexes, such as Apple's Mail). Some of these results contain those three magic words in the document's title. When I enter "Mac 911 invoice", with quotation marks included, however, I see 30 results, all of which have the words Mac 911 invoice in the title. But note that this trick works only when you enter entire words. If I enter "Mac 911 inv", for instance, I get bubbles.

Tools of the Trade: Have tools, will travel

Having recently spent several weeks on the road talking

continued on page 5

– Mac 911, continued from page 4

up Macs and the voodoo they do, I thought I'd cover the troubleshooting tools and utilities I pack when traveling. When my bags pass through airport security, here's what shows up on the X-ray machine:

- **iPod**

My iPod pulls double-duty when I travel—it not only holds enough music to get me through a couple of long flights, but also carries a bootable version of OS X, any applications and files I need for my trip, and the troubleshooting utilities required to fix my PowerBook if things go wrong. Creating a bootable iPod is no big deal. Your iPod should be 10GB or larger in order to hold a full installation of OS X and the files you need. To install OS X on the iPod, just treat it like any FireWire drive and follow the usual OS X installation procedure.

- **Bootable Utility and OS Discs**

I always travel with bootable Disk Warrior and Drive Genius discs, as well as a Tiger installation DVD. But since I don't dare risk damaging those discs while on the road, I bring copies. My original Disk Warrior disc isn't compatible with Tiger anyway, so I've downloaded the free DiskWarrior 3.0.3 CD Update, which allows me to create a Tiger-compatible bootable copy of the Disk Warrior CD. As for the Drive Genius and OS X discs, I use Apple's Disk Utility to burn bootable copies.

To do so, insert the disc you want to copy, launch Disk Utility (/ Applications/Utilities), select the disc in the left side of the Disk Utility window, and choose File: New: Disk Image From name of disc, substituting the name of the disc you've selected. In the Convert Image dialog box that appears, choose DVD/CD Master from the Image Format pop-up menu and None from the Encryption pop-up menu, and then click on Save.

Once you've created the image, select it in the left side of the Disk Utility window, insert a blank disc of the appropriate type (a CD-R if the original disc was a CD, for example), and click on the Burn button at the top of the window. In the sheet that appears, click on Burn again. When the disc is complete, it should contain an exact copy of the original, one that's capable of booting your Mac.

- **Cables**

The beautiful freedom of wireless networks hasn't yet reached much of the world, so my gear bag includes cables. Specifically, I carry a 6-foot Ethernet cable, a phone cable, two USB cables (one for standard peripherals and another with the kind of mini USB connector routinely found on digital cameras), and a 6-foot FireWire cable (helpful when I need to link my PowerBook and another Mac via FireWire Target Disk mode).

Tip of the Month: Wake the sleeping Tiger

Before Tiger, you could configure OS X's security settings to require a password when the computer woke from sleep or from a screen saver. Unfortunately, that meant the computer's other legitimate users couldn't log in without that password. Tiger offers a workaround.

First, go to the Security preference pane and select the Require Password To Wake This Computer From Sleep Or Screen Saver option. Then go to the Accounts preference pane. If necessary, click on the lock at the bottom of the window and enter an administrator password. Click on Login Options and select the Enable Fast User Switching option. Now, when the computer wakes up, the Authenticate dialog box includes a Switch User button. Click on this button to go to the login window, where other users can enter an account name and password to use the Mac.

USER GROUP VENDOR OFFER WEBSITE

MUG ONE members can find all the current Apple User Group vendor offers, complete with codes and URLs, in one handy location.

Apple User Group Advisory Board Vendor Coordinator Tom Piper has created a private, password-protected web page of all the current offers from the Apple User Group Bulletin, exclusively for user group members:

<http://homepage.mac.com/ugab/offers/vendor-codes.htm>

Password: *****

The website is for current user group members only, and the password is not for public distribution. The Apple User Group Advisory Board (of which MUG ONE's president, Elsa Travisano, is a member) hopes that this new web page will make it easier than ever to take advantage of vendor discounts and special offers for user group members.

Special Offers from the Apple User Group Bulletin

These User Group discounts are brought to you by the Apple User Group Advisory Board. You must be a current Apple user group member to qualify for these savings.

Anthro: 30 Percent Off Most Products

Anthro Corp. offers modular and ergonomic computer furniture with a Lifetime Warranty. Anthro would like to thank all of the Apple User Groups for continued support the last 21 years, by offering a 30 percent discount on most Anthro products.

This offer cannot be combined with other discounts and some items cannot be discounted. Using the special user group code, you can order by phone or web.

Coupon Code: *****

Phone (800) 325-3841

<http://www.anthro.com/mug>

This offer is valid through February 28, 2006.

Pressure Drop: 10% off Monitor Stand/Combo Hub for Mac mini

zStand is a stylish monitor stand that ingeniously incorporates a USB 2.0 and FireWire 400 combo hub. Delivering both beauty and brawn, zStand is sized perfectly for a Mac mini, but works equally well holding external hard drives and the like. zStand is the latest product of the Art-Techo movement, Pressure Drop's crusade to replace drab computer accessories with visionary peripherals that fuse technology with art.

Normally \$99.99, Apple User Group members receive 10 percent off.

Coupon code: *****

<http://www.pressuredropinc.com>

This offer is valid through March 31, 2006.

Two-for-One: Best-Selling Roxio Products

Get Toast 7 Titanium plus The Boom Box for one low price. As the updated industry-leading Mac CD & DVD burning suite, Toast 7 complements and extends the functionality of the Mac OS and iLife applications with innovative new features and ground-breaking capabilities. The Boom Box is the must-have software accessory for iPod or iTunes users.

For a limited time (while supplies last) Apple user group members can order both products from Roxio for only \$79.99, almost 50 percent off the regular price.

<http://www.roxio.com/go/mug2006>

This offer is valid through March 31, 2006.

Quickertek: 20 Percent Off

Quickertek offers proven products to enhance your wireless performance. Now, Quickertek's wireless performance products are available to user group members at a 20 percent discount. This includes the new Plug 'N Play antennas and transceivers, as well as other antennas and transceiver products and PowerBook handles. Don't forget to check out the newly-released Point-to-Point internet system!

JESSE HOGUE'S MAC MAINTENANCE AND SECURITY GUIDE - TIGER EDITION

MUG ONE's program co-chair Jesse Hogue has just come out with a OS 10.4 Tiger version of his Mac Maintenance and Security guide. The five page guide, in PDF format, can be downloaded from Jesse's website, <http://www.jessehogie.com/>

Jesse is the creator of Maintenance, an Automator script that has been downloaded from the Apple Automator website more than 10,000 times. His other Automator scripts include Back Me Up and Clipboard Viewer. All are available on his website. Keep up the good work, Jesse!

ROUGH CUTS - BOOKS IN PROGRESS

From Marsee Henon of the O'Reilly User Group and Professional Associations program:

O'Reilly's Safari Books Online has just announced a new service called Rough Cuts that gives early access to content on cutting-edge technologies months before it's published.

Rough Cuts allows you to purchase work-in-progress manuscripts of selected titles. You'll even have the chance to shape the final product by sending feedback to the author and editors. The beta version just debuted with four works-in-progress covering Ajax, Ruby, and Flickr.

For more information, go to:

<http://www.oreilly.com/roughcuts/>

Titles now available:

Ajax Hacks: Rough Cuts Version

<http://www.oreilly.com/catalog/ajaxhks/>

Flickr Hacks: Rough Cuts Version

Rough Cuts FAQ

<http://www.oreilly.com/roughcuts/faq.csp>

INTERNET EXPLORER SUPPORT CEASED, NO LONGER AVAILABLE FOR DOWNLOAD

As was noted at MUG ONE's December meeting, Microsoft's web browser Internet Explorer is no longer being supported for the Mac.

From Microsoft's Mactopia website:

In June 2003, the Microsoft Macintosh Business Unit announced that Internet Explorer for Mac would undergo no further development, and support would cease in 2005. In accordance with published support lifecycle policies, Microsoft will end support for Internet Explorer for Mac on December 31st, 2005, and will provide no further security or performance updates.

Additionally, as of January 31st, 2006, Internet Explorer for the Mac will no longer be available for download from Mactopia. It is recommended that Macintosh users migrate to more recent web browsing technologies such as Apple's Safari.

The MUGley Fool's Crossword Puzzle

by Brian Foley • answers on page 9

Across

- 3. Apple's Adam
- 4. If two vice-presidents did a "360" and got married, what their last name might be.
- 8. Elsa is our "Fearless Leader" now, but previously, we had _____ the helm.
- 10. Conjunction of two special gals who are a couple of regular "guys" - (the answer sounds like a name repeated).
- 12. Dodgy memory?
- 15. Me, pal!
